

Today's Special - Todo App

Welcome to Today's Special - your personal Todo Application! This application is designed to help you manage your daily tasks effortlessly. Powered by Flask and a robust Database Management System (DBMS), it allows you to store and retrieve your todo items easily.

Features

- **Task Management:** Add, update, and delete tasks.
- **Priority Setting:** Set priorities for your tasks.
- **Date and Time:** Schedule tasks with due dates and times.
- **Database Storage:** Utilizes a robust Database Management System for efficient data storage.

Usage

1. Clone the repository:

```
bash git clone https://github.com/vijaytakbhate2002/todo-app.git
```

1. Install dependencies:

```
bash pip install -r requirements.txt
```

1. Run the application:

```
bash python app.py
```

1. Access the application in your browser at <http://localhost:5000>.
